

**Versatile, Virtually Indestructible
and Ready for the Extreme**

The D-series was built with expandability and system flexibility in mind, and the Dotworkz BR-ACC1 Accessory Component Mounting Plate allows for further customization of camera systems within the D2 and D3 enclosures.

Made from lightweight powdered-coated steel, the BR-ACC1 mounting plate is ready-made to easily integrate popular electronic components, and is easily modified to accommodate any non-standard design.

innovative

BR-ACC1: Dotworkz Accessory Component Mounting Plate

Description:

The BR-ACC1 Accessory Component Mounting Plate is compatible with all Dotworkz D-Series housings, and enables valuable system components to be integrated into the enclosures.

The BR-ACC1 attachment plate allows for the addition of features such as wireless radios, 3G/4G routers, switches, fiber modems, intercoms, tamper switches, etc. and is also easily customizable if additional holes or attachment points are desired.
