

EZ Lock Pole Mount System with Angle Correcton Plate

Dotworkz EZ Lock Pole Mount is a mounting adapter designed to easily secure to all poles with a minimum of 1" or larger diameter, using customer provided 0.5"-0.75" wide stainless steel strapping. EZ Lock Pole Mount can also be used to mount antennas such Omni or Yagi on upper flat surface to assist with multi-faceted installations.

The angle correction plate can be used to adjust the enclosure up to 10 degrees non-vertical surfaces. The angle correction plate can be flipped 180 degrees to correct both inward and outward tapered traffic poles.

Description:

Dotworkz Systems EZ Lock Pole Mount, designed to fit a variety of pole diameters, is perfect for most towers, street poles, masts, and other mounting locations.

The BR-MPM1-AC EZ Lock Pole Mount features a tilt plate which allows the camera to maintain the required horizontal plan, even if the mounting surface is not vertical.

Specs:

Shipping Weight:
2.24 lbs (1 Kg)
Shipping Dimensions:
8" x 8" x 3"

Features:

- Compaitable with all Dotworkz, Videolarm, Axis, Sony and other housing systems
