

## Panasonic AW-HE40

### Recommended Dotworkz Enclosure:

D2/D3 with KT-CLNS-EXT75

- Bottom mounting recommended
- Requires the 7.5 extended lens (KT-CLNS-EXT75)

### Camera Housing Notes

This camera is compatible with either of the D-Series housings with a standard lens (utilizing our regular gasket seal) or the external 7.5 lenses with VHB seal. If the standard lens is used, it would require a standoff height of 3.25", whereas the extended lens case would require a height of 2.75".

### Summary

The Panasonic AW-HE40 is a medium form factor camera with a footprint of 160mm x 186mm x 166mm (WxHxD), making it a great candidate for the D2/D3 housing with a 7.5 extended lens.

### Interior Climate Controls

Dotworkz offers advanced interior climate control systems for camera housings, ensuring optimal operating temperatures for surveillance equipment in all environments. Dotworkz camera housings feature both active heating and cooling to protect surveillance equipment in challenging conditions.
